Outlook

Dear business friends,

there are good reasons why BWT water+more is Europe's technology leader in water optimization in the hospitality sector. Thanks to your feedback and support we can provide you with innovative BWT products every year. We would like to thank you most sincerely for this.

We continuously further develop our systems for the hospitality sector and our innovative thinking leads to direct action. Preventing scaling was the only focus in water treatment for a long time. But we have taken another big step here. As the first water filter manufacturer worldwide, we have put the taste of the water produced under the microscope and have developed unique filter systems that convert untreated water into perfect coffee water – no matter where it comes from, its individual properties, the outlet and the machines used.

At BWT water+more it would be an understatement to just talk about a water filter. For our water optimization systems, "Multi-Stage Filters", we skilfully combine different technologies such as filtration, adsorption, selective adsorption, ion exchange and mineralization in compact units. Space-saving, with maximum user-friendliness and tailored precisely to the relevant requirements. Depending on what sort of untreated water is supplied and which tasks are involved. The Multi-Stage Filter from BWT water+more always fits – guaranteed!

With our reverse osmosis technology, we have completely redefined water optimization once again - more compact, better performance and more efficient. This is how BWT bestbarista ROC COFFEE, our innovation in the past – set completely new benchmarks in optimizing drinking water for making coffee, coffee specialities and other hot drinks. It has never been so easy, reasonably priced and safe to refine all locally available drinking water into the right water for preparing coffee.

Besides good taste thanks to BWT innovative water filter systems, sustainability plays a major role in our product portfolio. We are aware of our responsibility towards the environment. Whether plastic waste or CO₂ emissions caused by long transport routes, we offer sustainable alternative with intelligent solutions. We hope we will be able to support you with our products and concepts for your business success. Let's shape the future successfully together. We wish you a successful year of business in 2025.

Kind regards,

BWT water+more

BWT water+more

Customer Service Center

Our water specialists have access to the dealer network and users in the hospitality sector. Our water professionals take their task of recommending the best solutions for water optimization in the hospitality sector very seriously and make an important contribution to its value creation.

Just a few steps to the right

Water optimization

The most efficient water optimization can be chosen from the entire BWT water+more product range for every local water quality level, every quantity of water needed, every water demand and every space.

EASY AND OPTIMAL.

Determine the local water quality

- » Easy with the drip test
- » Measures total hardness
- » Measures temporary hardness

BWT besthead FLEX filter head – for all BWT water+more filter cartridges

- » Safely stopped bypass setting with easy-view displays
- » Refined new connection technology for great flexibility when installing filters
- » EASY Vent flushing valve for easy and reliable purging
- » DVGW-tested check valve on the inlet and outlet
- » Safe filter changes with no water leakage

Simple solution in the palm of your hand

BWT Best Water Professional App

With the App for smartphone or tablet, the selection of the right filter system for the respective application is child's play.

The smart product advisor

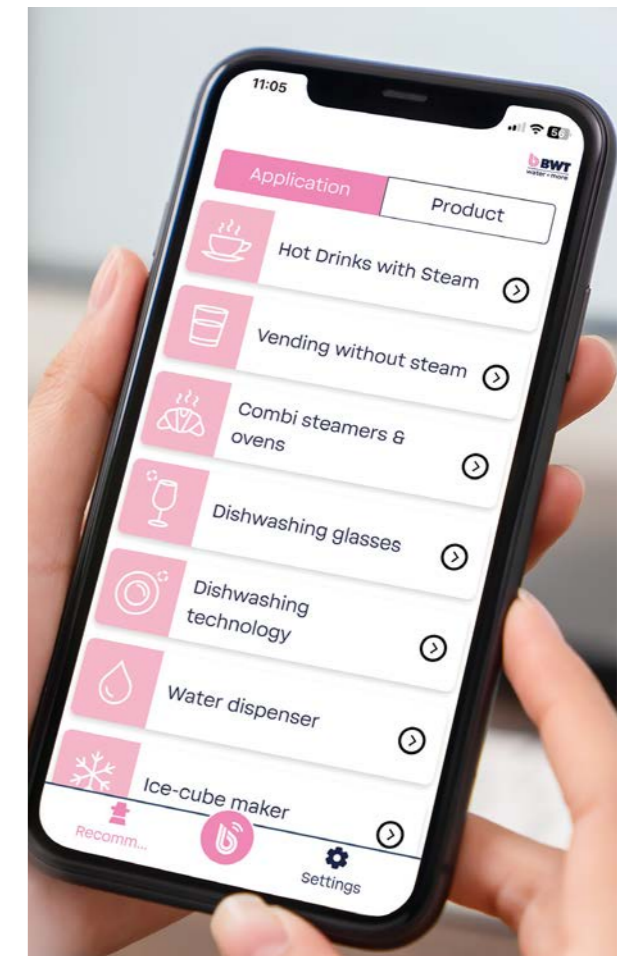

Every water has its own mineral composition, depending on where it flows out of the tap. It is sometimes too hard or too soft and often contains undesirable chlorine compounds or off-flavors.

The good news: With the BWT Best Water Professional App for your smartphone or tablet, you can quickly and easily find the right product. This means that users can confidently ignore the water at the point of use, as the systems from BWT water+more optimize every raw water perfectly for every application. At the same time, they protect the machine from deposits and corrosion.

With the BWT Best Water Professional App, you can keep an eye on our suitable BWT water+more products anywhere and at any time:

An app for the respective requirements - i.e. the local water quality, the required water quantity and the specific customer application - as simple, fast, safe and convenient as possible:

- » Enter local water hardness, application and consumption, and the right filter in the optimum size and replacement date are displayed.
- » Practical tips and information about water optimization complete the offer.
- » Direct contact to your BWT water+more contact person.

BWT besthead FLEX

The innovative filter head ...

... benefiting everyone. The restaurant owner, because they save valuable space under the counter. And the service technician, because they save valuable time when installing filters.

This is guaranteed by the patented FLEX Insert connection, which can be assembled with a clip and without any tools. The elbows can also be radially adjusted in steps of 30°, enabling perfect pipe routing and easy assembly in tight spaces.

This new filter head from BWT water+more sets a new standard in flexibility. With patented connections for every installation situation, the simplest assembly and maximum safety.
